

Our ref: 000912762

8 May 2019

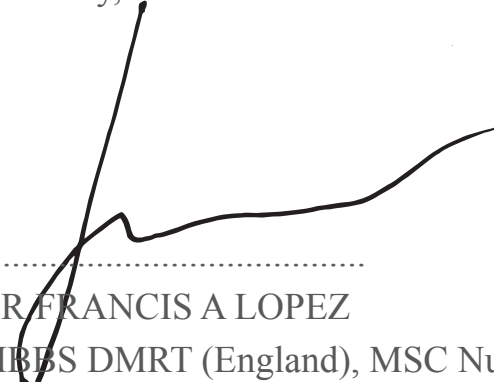

I certify to the best of my medical knowledge, that the patient named Teoh Cheng Kooi is terminally ill with advanced stage pancreatic cancer.

The patient has chosen to allow the disease to run its course without the interference of chemotherapy and has a probable life expectancy of six (6) months or less if the disease runs its expected course.

I have advised his family to be present with him during this time and to his daughter and primary caregiver, Luanne Teoh and her wife Molly Patrick to cancel all future travel plans.

Thank you.

Sincerely,

.....
